

Third birthday for FitalPRO, birthday candles and new products.

The first products of the professional FitalPRO line were presented by Fital right at the Namm 2006 in Anaheim, California, USA.

Today, after three years, Fital headquarters celebrates 50 years of activity and FitalPRO proposes more new products to complete its consolidated range of professional loudspeakers dedicated to the world of sound reinforcement at 360 degrees.

Woofers, mids, compression drivers and horns, for high power use in professional audio applications, will be on show at the Namm 2009 edition, in which very interesting novelties will also be announced.

The official Californian fair organization defines this 2009 edition as a moment not to be missed, also because the global economic crisis and the rapid technological changes force people to be very well prepared and up to date in their fields.

The Namm is just the right occasion to meet important people in the audio area, to see new solutions, participate in talks, "recharge batteries" and in our case... horns, to make companies stronger and more competitive by updating information on what the market proposes at top levels.

With in mind, as in previous years, FitalPRO re-proposes a stand where friends and clients can be welcomed, teaming consolidated product ranges, already adopted by many manufacturers on a worldwide level, with new products joined by the same philosophy - the "factory brand" - of quality and uncompromising reliability:

- A new lightweight super-woofer, with neodymium magnets, for high power, easy to align, just 18" but able to give the performance of 21",
- A new 15" woofer of the Five Hundred series with 520 Watt power, always with neodymium magnets and the first of a new series of products to come,
- A new 6" mid-woofer able to hold 150W,
- Two new aluminum horns with continuous, constant directivity to pair with high frequency

PROFESSIONAL LOUDSPEAKERS

compression drivers, one of these with an almost square profile, the "Manta ray"

At Namm 2009 all of the novelties just announced and all FaitalPRO products will be present, plus a large part may be heard in sound rooms dedicated to the purpose.

**The appointment at the NAMM Show is in Hall A, booth 6498
January 15-18, 2009**

Looking forward to meeting you in person!

Flavio Naggi
